

Weekly Report

2018.04.02-2018.04.08

Job summary

- Cooperating mainly with Xumeng Wang, Huihua Guan and Wenlong Chen, by the guidance of Prof. Chen, I finish part of the work of the Social Privacy Protector Visualization System, with my work including the coding on the building of the front-end framework and some crucial modules with the implement of javascript, editing the submission video, and etc.

Work plan

- keep on learning about the react framework such as redux, router, flux and etc.(2018.04.15)
- Learn about Django(python), koa2(js), and etc. to master more tech in back-end development. (2018.05.01)
- Since the tensorflow.js is just published, take some time to learn it and try to some projects with it. (2018.05.10)
